# SafetyPro 300 Twin

**BARRIER**  
**WAREHOUSE**.com

## LONG SPANS WITH GREATER PEDESTRIAN CONTROL

SafetyPro 300 Twin is a long run safety barrier whose lower belt improves access control as it restricts pedestrians from ducking under the belt and makes this product ADA (Americans with Disabilities Act) compliant. Manufactured from stainless steel with a cast iron base SafetyPro 300 Twin has the durability to withstand years of wear and tear in working environments. This model's 16'/4.9m belt length halves the number of barriers that are needed with the industry standard 7.5'/2.3m belt. Fewer barriers lowers total purchase cost and reduces the labor required to set up and take down barrier systems. Also featured on the SafetyPro 300 is our unique two piece post construction which allows the lower belt mechanism to be easily replaced in the field.

Model SPRO300TwinY

### SPECIFICATIONS

Height: 40"/1015mm

Weight: 24lbs./11kg

Post Diameter: 3"/75mm

Base Diameter: 14"/355mm

Belt Length: 16'/4.9m
