

RollerPro 300 Twin

TWIN BELTS WITH EASY MOVEMENT

RollerPro 300 Twin allows the fast set up of high capacity queue systems. The roller base enables quick, easy deployment of the stanchion without heavy lifting. The extra length 16'/4.9m belt means that only half the number of stanchions is needed than with the industry standard 7.5'/2.3m belt. The lower belt improves pedestrian control by keeping children in line, restricting "line ducking" and provides guidance for the visually impaired using a cane. The lower belt also makes this product ADA (Americans with Disabilities Act) compliant.

Model ROL300TwinB

Roller base for fast easy moving

Full coverage rubber floor protector

Easy replacement of the lower belt cassette

Break for slow, safe belt retraction

Belt locks to prevent accidental belt release

Universal belt end connects to all major brands
