

# SafetyPro 250 Triple

## MAXIMUM BARRIER PROTECTION

The SafetyPro 250 Triple is designed to provide maximum access control to restricted areas. The triple belt configuration ensures pedestrians cannot duck under the belt and is a lower cost, more flexible option to using rigid barriers or solid panels. A wide variety of high visibility belt colors and safety messages are available which can be used in combination to maximize awareness of restricted access. Maintenance costs are kept low by the three piece post construction which enables the lower belt cassettes to be easily replaced.
