

# GS42

# GUARDSAFE® 42 BARRIER

Remcon's GUARDSAFE 42 barrier is a water-filled Longitudinal Channelizing Device (LCD) ideal for traffic and pedestrian channelization in almost any environment. The barricade is manufactured with rotationally-molded polyethylene, which allows it to withstand the harshest weather conditions and resist dents and cracks.

- Each unit includes:
  - Tongue and groove end feature, which allow connected units to form continuous lines and curves angled up to 15 degrees.
  - Features two molded-in pockets which easily accept standard blinking lights.
  - Molded-in recessed handles, two forklift holes, and its lightweight design make transportation and positioning easier for users.
- Available in three standard weights and three standard high-visibility colors: natural, orange, and yellow. Custom colors available upon request.
- Ideal for temporary work zones, checkpoints, security, as well as crowd and traffic control.
- Can be used as a TL-2 Barrier when used with steel pipe couplers.
